# Who is NumatREC?

More than 25 years after being founded by father and son team, Peter and Mike Judd, NumatREC continues to be here helping kiwi kids thrive as individuals, by creating safe playground surfaces that contribute to games won, strong friendships, and days enjoyed with family.

Cotswold School, Christchurch

NumatREC's beginnings were down-to-earth. Creating mats for play centers and kindergartens from locally sourced rubber chips using a secret family recipe.

At the time, the concept of playground safety was in its infancy. Hard surfaces were still the norm; under swings, slides and even adventure playgrounds.

For the NumatREC team, it was hands-on from the start. Mats were manufactured in the morning and sold in the afternoon; the team often peeling off their gloves to take phone orders. The dedication paid off. An early, and iconic, installation was the "safe landing" for the nursery rhyme-themed Humpty Dumpty wall at the nearby Oamaru Public Gardens. Larger projects with local councils soon followed.

Built on innovation and hard work, it was a natural step for NumatREC to embrace new ideas and technologies from around the globe. Safety was still at the company's heart. But they saw the potential for surfaces that would creatively use texture, colour, and shape to inspire play, and encourage fulfilled and healthy living for people of all ages and abilities. From playgrounds filled with children's laughter to sports centres packed with cheering crowds.

Since then, NumatREC has continued to grow, with happy customers all over New Zealand.

# Care for our people and our planet

There are over one billion tyres manufactured worldwide each year. Each has a limited lifespan on the vehicle it is originally intended for. And then what?

How do you turn this wide-ranging, long-term waste into a valuable resource? Sometimes the answer is at your feet...

We are committed to environmentally friendly products and sustainable manufacturing processes.

Almost all of our surfaces use rubber recycled from waste vehicle tyres using a clean and efficient recycling process in New Zealand, Europe or Canada.

The rubber used in these tyres comes from sustainable forests of the Pará rubber tree, *Hevea brasiliensis*.

**The average NumatREC surface uses around 4 tyres per square metre. This represents around 63kg of CO<sub>2</sub>-emissions that would otherwise be released into the atmosphere through incineration.**

Our dedication to reducing, recycling, and reusing ensures we can minimise wastage as we maximize play spaces. This is a company-wide mindset – our work is about small feet, great feats and, with our focus on sustainability, a smaller footprint for our business.

**Sustainability Goal 2022**

# Pour'n'Play®

## The world's leading dual-pour rubber surface system.

Pour'n'Play® is the most technically advanced wet pour rubber surfacing system in New Zealand. Pour'n'Play® is the ideal choice for playgrounds where safety, durability, and aesthetics are paramount.

With its unique TPV rubber formulation, Pour'n'Play® offers much better colour consistency throughout, and superior UV stability when compared to EPDM and colour coated SBR surfaces.

Pour'n'Play® surface shown with shockpad.

## Features & Benefits

- A porous free draining product
- Shock-pad depth can be increased to meet critical fall height requirements
- Meets New Zealand safety standards
- UV and weather resistant top layer
- Seamless surface, suitable for wheelchairs
- Recycled rubber shock-pad

## Applications

- Playgrounds
- Paths and bike tracks
- Outdoor learning environments
- Sports courts
- Wet play areas

### A World of colour.

Pour'n'Play® comes in a range of 21 colours giving you so much scope to create fantastic designs. Using different colours in different ratios, Pour'n'Play® literally has thousands of colour combos. You can have fun with these to create your own unique colourway.

Visit our Pour'n'Play® colour mixer at [numatrec.co.nz/colour-mixer](http://numatrec.co.nz/colour-mixer)

Please note colours may vary slightly from samples shown.

### Pour'n'Play® Eco Blends.

Saving the Environment... and your Budget.

Made with up to 70% recycled material, our Pour'n'Play® Eco Blends offer affordability and sustainability in one seamless package. Each blend can be custom made to suit your budget and desired colour ratio.

# MulchSet®

## A 'natural look' safety surface with all the benefits of durable rubber.

MulchSet® is a 'natural look' safety surface that provides an economic and hygienic alternative to organic mulches. As a long-lasting, water-permeable surface, it is the perfect option for recreational areas, playgrounds, walkways, and even root protection in your space.

Its one-piece poured installation delivers a smooth surface with zero joins making it highly accessible.

MulchSet® surface shown with shock-pad.

Please note colours may vary slightly from samples shown.

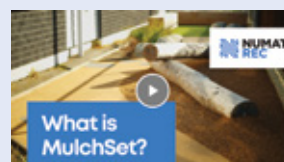

### Features & Benefits

- A porous free draining product
- Soft, springy safety surface
- Installable on a gradient (mounds, slopes, etc)
- 2 colour options available
- Seamless surface, highly accessible

### Applications

- Playgrounds
- Paths and bike tracks
- Outdoor learning environments

[numatrec.co.nz/what-is-mulchset](https://numatrec.co.nz/what-is-mulchset)

Willowpark School, Auckland

### Choose from our forest floor and wood mulch blends.

These colour blends were specially created to mimic nature. The green blend looks like a real forest floor and you could easily mistake the brown blend for real wood mulch. Unlike colour-coated rubber mulches, MulchSet® is 100% dyed, which means it retains its colour longer.

Kohia Terrace School, Auckland

## MulchSet®

01

02

- 01 Parliamentary Playground, Wellington
- 02 Pahurehure Reserve, Auckland
- 03 Willowpark School, Auckland
- 04 Tirimoana School, Auckland

03

### A little goes a long way.

MulchSet's soft top layer can be installed without shock-pad under play equipment with fall heights below 1.6 metres. This makes MulchSet® particularly affordable in these types of playground applications.

04

Pinehurst School, Auckland

# PermaPlay

## A shock-absorbing turf system suited to playground applications.

It may look like grass but PermaPlay serves a much greater purpose in a fall zone.

We developed this super realistic synthetic grass and shock-pad combo as a more natural looking alternative to rubber playground surfacing.

For safe, straightforward play across every type of outdoor condition, PermaPlay is the ideal solution.

PermaPlay surface shown with a recycled material shockpad.

### Features & Benefits

- Natural Appearance
- Permeable surface allowing water to drain through
- Non-allergenic and safe for children and pets
- Low maintenance
- UP to 20% cooler surface than similar turf products
- Shock-pad layer is designed from recycled materials

### Applications

- Playgrounds
- Outdoor learning environments

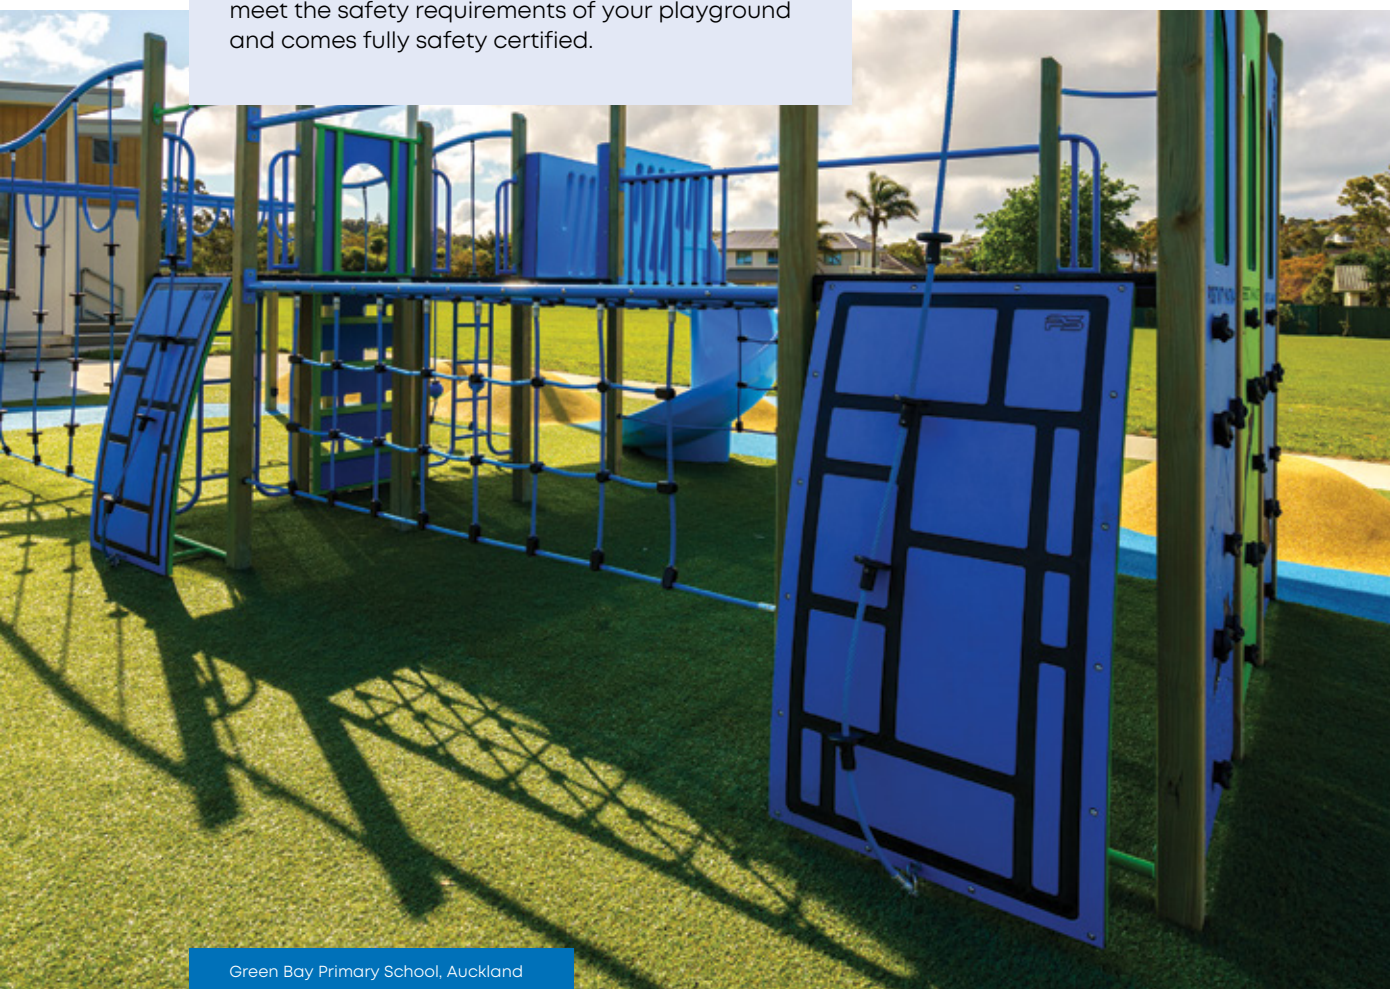

Pomaria School, Auckland

### The Critical Fall Height (CFH).

The Critical Fall Height (CFH) protection provided by PermaPlay depends on the thickness of the shock-pad that is installed underneath. Like all of our safety surfaces, PermaPlay is engineered to meet the safety requirements of your playground and comes fully safety certified.

Green Bay Primary School, Auckland

# PermaPlay

01

02

03

- 01 Cummings Park, Wellington
- 02 Pahurehure Reserve, Auckland
- 03 St Anne's School, Wellington
- 04 Jardine Park, Queenstown

#### How long will it take to install?

Our surfaces are installed in two stages. Stage one takes around 3-4 days and involves preparing the base for the new play surface. Stage two takes another 3-4 days to complete and involves the installation of the shock-pad and top 'wear' layers.

04

Queenstown Garden's Playground, Queenstown

# PermaTurf

## Synthetic Grass that's Up to 20% Cooler

While PermaTurf looks like real grass, it never needs mowing or watering. Engineered to be hard-wearing and hold its form longer, even in high traffic areas, PermaTurf is an excellent option for low-maintenance landscape surfacing.

It is a great surfacing option for sunny locations, providing up to 20% cooler surface temperatures than similar artificial turf products. Dependably lush and conveniently free-draining, this is the turf that sets the standard in landscaping turf.

## Features & Benefits

- Natural appearance and texture
- Heat blocking technology for up to 20% reduction in temperature
- Permeable surface allowing water to drain through
- Can be cut to desired length
- Option to install with shock absorbing underlay

## Applications

- Landscaped areas
- Playgrounds
- Outdoor learning environments

Kensington Park, Wellington

Rotorua Lakes High School, Rotorua

# Pour'n'Play® Sport

## The more colourful and comfortable court surface.

Pour'n'Play® Sport is created using New Zealand's most technically advanced wet pour rubber safety surface. Ideal surfacing choice for court areas where safety, durability and looks are essential.

Pour'n'Play® Sport is easy to maintain, keeping it's vibrant colour and elasticity. Court markings are installed as an integral part of the surface, giving you the freedom to add your own personal touch.

Available in a range of 21 colours offering endless possibilities for creative surface designs.

### Features & Benefits

- A porous free draining product
- UV and weather resistant surface
- Seamless surface, suitable for wheelchairs
- Thousands of colour blend options

### Applications

- Basketball Courts
- Netball Courts
- Court yard with surface games

Alfriston School, Auckland

**Colour it your way.**

Pour'n'Play® Sport is the ultimate designable sports surface. Add lines, shapes, words, and logos, in practically any colour blend you want.

Kopupaka Reserve, Auckland

# Custom Surface Design

## Add a little extra to your play space.

(Bike tracks, Paths, Ground games):

Utilise the creative versatility of Poun'n'Play® to add unique play opportunities into your space such as bike tracks, paths, ground games, characters, values, and more.

Poun'n'Play® can be installed as single or multiple layers, depending on the application, making it a great surface option for playgrounds, outdoor learning spaces, concrete areas, courts, and more.

With 21 colours to choose from, there are endless possibilities for creative surface designs.

### Features & Benefits

- A porous free draining product
- Meets New Zealand safety standards
- UV and weather resistant surface
- Seamless surface, suitable for wheelchairs

### Applications

- Playgrounds
- Paths and bike tracks
- Outdoor learning environments

Cornwall Park, Hastings

### Already have a surface design?

No problem. We work with designs in all manner of formats to deliver the results our customers want. If you want to discuss your own design simply call us on 0800 686 124.

04

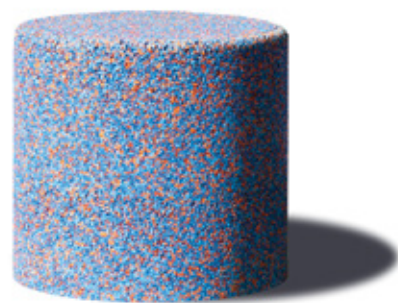

Cotswold School, Christchurch

# Steppers

## Create a challenging playground that develops both bodies and minds.

Steppers make for the perfect addition to any play surface. They can be used to create seating, balance play and edging around your playspace while also developing imaginative and open-ended play.

Steppers as seats can be walked along, stepped over, or lead to other spaces to explore.

### Features & Benefits

- Customisable colours to suit playground themes and colour-schemes
- Hard-wearing
- Customisable size options available
- Made from UV and weather resistant rubber
- Endless colour options

### Applications

- Playgrounds
- Outdoor learning environments

Prospect School, Auckland

### Size Options

Note: Steppers for bark playgrounds come with 300mm extra height to be covered by surrounding bark.

## Steppers

Illam School, Christchurch

# Pour'n'Play® Seats

## Who knew seating could be this fun?

Adding seating into your space just got more fun with our Pour'n'Play® seats. These seats act as both a practical seating opportunity or an extra play accessory. You can get creative with colours and blends from our 21 Pour'n'Play® colour range.

Made of Pour'n'Play® rubber, these seats are durable, fun, and such a great way to add an extra touch of playfulness to your space.

### Features & Benefits

- A porous free draining product
- Anti slip surface
- Made from UV and weather resistant rubber
- Pour'n'Play® colour options available

### Applications

- Playgrounds
- Outdoor learning environments

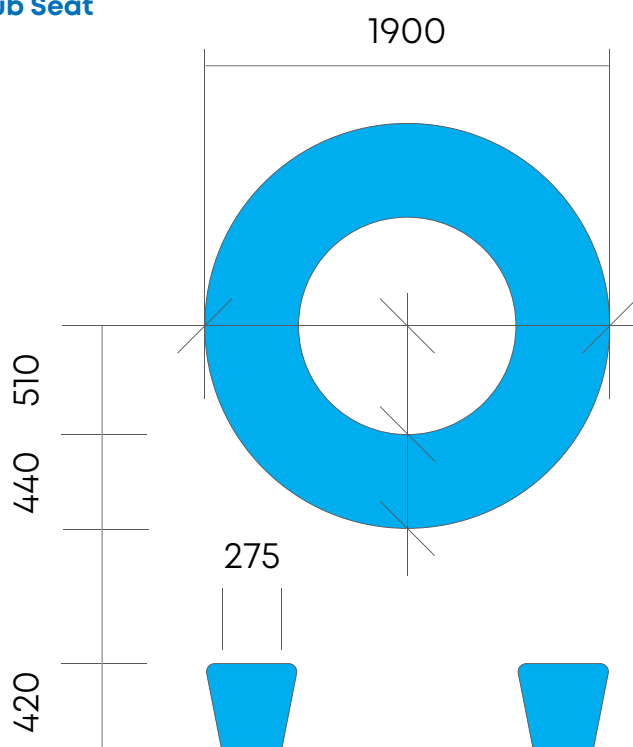

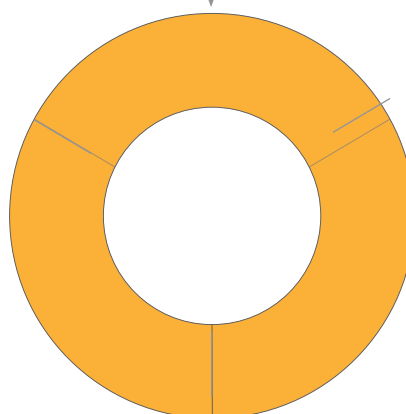

Tirimoana School, Auckland

### Hub Seat

### Curved Seat

Arc seat needs to be one third of this ring

### Create your own seating colours and layout.

Pour'n'Play® seats can be put together to form a ring or broken up into segments to suit any particular space or layout you desire.

Pour'n'Play® literally has thousands of colour combos. You can have fun with these to create your own unique colourway.

Visit our Pour'n'Play colour mixer at [numatrec.co.nz/colour-mixer](http://numatrec.co.nz/colour-mixer)

# PlayPods

## Permanent scuff zone solution under play equipment.

Designed and developed as a permanent solution to the problem of bark scuffing out under play equipment. Installed under play equipment, they provide a long-term safety surface and all-weather scuff zone.

### Features & Benefits

- A porous free draining product
- Easy Application
- Anti slip surface
- Made from UV and weather resistant rubber
- Pour'n'Play colour options available

### Applications

- Great for use under swings, slides, ladders, and anywhere else surface scuffing occurs.

Just Kids Kelston, Auckland

# Pour'n'Play® Nature

## Bring some fun elements of nature into your space.

Add a little fun into your play space with the Pour'n'Play® 3D nature pieces. Made from durable Pour'n'Play®, these nature-inspired structures are hard-wearing, colourful and full of personality.

You can create your own world with our range of rubber rocks, mushrooms, animals, and planets. These features encourage balancing, jumping, bouncing, climbing, and imaginative play in your space.

Easy to install, low maintenance.
